ALPHA IVF CENTRE
ALPHA WOMEN'S SPECIALISTS

About Us

Alpha IVF Centre / Alpha Women's Specialists (Singapore) is set up in Singapore by leading specialists in fertility, obstetrics, and gynae-oncology in the region.

Alpha IVF Centre is equipped with modern and effective technologies to maximise your IVF success rates. These includes equipment such as the EmbryoScope+, which provides optimal culture environment, and time-lapse embryo monitoring facilities, that enhance embryo development and selection of the best embryo for transfer into the uterus.

In the interest of embryo care Alpha IVF Centre exclusively uses Cryotec®. Since its introduction in August 2013 the cryopreservation system has consistently achieved a 100% survival rate within the Alpha IVF Group for almost 5,000 frozen embryos and blastocysts.

Most importantly, this purpose-built Alpha IVF Centre provides a "one-stop" concept as we strive to reduce the hassle of our patients needing to travel between consultations and their IVF treatments.

This quest to be a Centre of Excellence sets us apart as we provide in-house obstetrical care for all ensuing pregnancies and gynaecological expertise for all benign and malignant conditions requiring surgery.

Since the start of operations on 1st of November 2019, Alpha IVF Centre (Singapore) has achieved a commendable success with fertilisation rates of 76.2% and blastulation rates of 58%, affirming the high standards of our IVF laboratory culture conditions.

Alpha IVF Centre / Alpha Women's Specialist (Singapore) is located in Royal Square, which is part of the Novena healthcare hub. It is situated near the Novena MRT station and is within walking distance from amenities such as hotels, malls, and Mount Elizabeth Novena Hospital.

Alpha IVF Centre / Alpha Women's Specialists (Singapore) is part of the Alpha IVF Group which was established since 1994. The Group comprises of pioneer IVF centres in Kuala Lumpur and Penang. As the name Alpha suggests, doctors and staff at Alpha IVF Group have pioneered numerous innovative fertility treatment procedures that have led us to achieve many world firsts, optimising pregnancies for each and every couple.

In this tradition of firsts laid down by the Group, we at Alpha IVF Centre / Alpha Women's Specialists (Singapore) are committed to putting our patients and their fertility needs as our first priority. We individualise treatment plans for every couple, enabling them to fulfil their full potential for parenthood and treating any obstetrical and gynaecological conditions that may arise.
