

## Enhancing Life, Excelling in Care

### About Us

Alpha IVF Centre & Alpha Women's Specialists (AIVF / WS) is located at Royal Square At Novena in the heart of Singapore's healthcare hub. The centre is easily accessible via Novena MRT and is within walking distance from amenities such as hotels, malls, and Mount Elizabeth Novena Hospital.

"Alpha IVF Centre & Alpha Women's Specialists" is a one-stop fertility centre in Singapore which provides a comprehensive range of fertility treatments. Our IVF laboratory is equipped with advanced and effective equipment and assisted reproductive technologies to optimise your success rates. Our services include Intrauterine Insemination (IUI), In-Vitro Fertilisation (IVF), Intracytoplasmic Sperm Injection (ICSI) and Time-Lapse Culture System.

On top of a whole range of women's healthcare services, our services include a special focus on fertility, using Assisted Reproductive Technology (ART), and on treating gynaecological cancers. We provide in-house obstetrical care for all ensuing pregnancies and gynaecological expertise for all benign and malignant conditions requiring surgery.

Our "Patient-Centric" care helps you feel at ease in a supportive and discreet environment with as little stress as possible. This is reinforced through doctor-patient communication, healthcare provider-patient interactions and even by the centre's conducive interior design.

"Alpha IVF Centre & Alpha Women's Specialists" is part of Alpha IVF group (established since 1994) that comprises pioneer IVF centres in Kuala Lumpur and Penang. As the name Alpha suggests, doctors and the team of this Group have pioneered numerous innovative fertility treatments and achieved many world firsts.
